PROFILE SUMMARY

Software engineering professional with experience building web applications, validating APIs, and improving software quality through manual and automated testing. Skilled in React, Next.js, Java, Python, SQL, REST APIs, Git, Selenium, and Agile workflows. Passionate about developing reliable, scalable software solutions and collaborating with development teams.

SKILLS

Programming: Java, Python, JavaScript, SQL, PHP

Frontend: React, Next.js, HTML, CSS

Testing: Selenium, JUnit, Postman

Tools: Git, Jira, Jenkins, Docker

Cloud: GCP

Soft skills: Problem-solving, Clear Written & Verbal Communication, Attention to Detail, Analytical Thinking, Team Collaboration, Time Management, Adaptability

PROFESSIONAL EXPERIENCE

QA Engineer Intern, Grid Dynamics, Kingston

Jun 2025 – Dec 2025

- Tested Trello board REST API endpoints including POST, PUT, DELETE, and UPDATE operations using Postman to validate functionality, status codes, and error handling
- Created and maintained 90+ manual test cases covering functional, regression, and integration testing scenarios for simulated web application projects
- Executed Selenium-based automated regression tests and analyzed results through Allure Reports to support test tracking and defect visibility
- Participated in Agile sprint meetings, test planning sessions, and QA discussions to improve testing workflows and documentation quality
- Used AI-assisted tools to enhance test documentation clarity and support structured test case generation

Computer Technician, Florville Pharmacy, Yallahs

Jul 2022 – August 2022

- Resolved day-to-day technical issues for staff by troubleshooting software, hardware, and system-related problems to maintain smooth operations
- Assisted with software updates, system maintenance, and invoicing system support to improve workflow efficiency and reduce downtime
- Performed basic technical support and system checks to ensure reliable workstation performance and operational continuity

Volunteer Lab Technician, Yallahs High School, Yallahs

Sept 2020 – Nov 2020

- Troubleshoot and repaired computer systems for students and staff, helping maintain reliable access to school technology resources
- Assisted with internet setup, connectivity troubleshooting, and basic network maintenance to support stable classroom operations
- Performed routine computer lab maintenance, software checks, and technical support to improve system usability and performance

EDUCATION

University of Technology, Jamaica 2020 - 2024

Bachelor of Science in Computing

- Upper Second Class Honors

PROJECTS

Personal Portfolio · Next.js, React, Three.js, GSAP, Nodemailer

Full-stack portfolio with a custom 3D animated globe, GSAP scroll animations, Work/Life page split, project modals, and a server-backed contact form with Next.js API routes

ADDITIONAL INFORMATION

- **Languages:** English (Fluent), French (Basic), Spanish (Basic)
- **Certifications:** Google Cloud Digital Leader · DevOps Agile CI/CD · API Security Fundamentals · OWASP Top 10 · Relational Databases & SQL · DevOps Foundations · Cloud Architecture Core Concepts
- **Awards/Activities:** SCIT Mentor (2022), Reading, Basketball, Dancing, Painting
